Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is responsive to the applicant's amendment dated 09/07/2006.

Election/Restrictions

2. Applicant's argument with regard to the Election/Restrictions requirement in the last Office action is considered and deemed persuasive and, therefore, the Election/Restrictions requirement of that action is withdrawn. All claims (1-16, 28 and 30) are considered in this office action.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-16, 28 and 30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claimed invention of claims 1-16, 28 and 30 is not patent eligible subject matter because the claimed invention would impermissibly cover every substantial practical application of, and thereby preempt all use of, an abstract idea, natural phenomenon, or law of nature. Independent claims 1, 11-14 and 30 mainly recite an audio signal format having N components; a method for representing an audio signal that is decomposed to a signal having N components, and having M sub-signals; a

method for representing an audio signal that having at least two directional signal components. The claim language as recited clearly would impermissibly cover every substantial practical application of, and thereby preempt all use of, an abstract idea with regard to an audio signal having multiple components. In general, audio signal is inherently having different components (such as frequency, amplitude components), and the recited claims are claiming just generic audio signal that is natural phenomenon.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xu Mei whose telephone number is 571-272-7523. The examiner can normally be reached on Monday-Friday (9:30-6:00).
